

LEVEL 5

The tree can now be anywhere.

- You are given a list of lawns. Each lawn has one tree on it.
- **For each lawn, find a valid path.**
- You can choose the start and end cell.
- Every given lawn is solvable. There are multiple correct solutions.

Input - identical to previous level

Name	Description	Example
N	Number of lawns	3 5 7 X.....
Repeated N times	 7 6X 6 6 X.....
Lawn size	The width and height of the lawn	
Lawn	A paragraph of characters	

Output - identical to previous level

Name	Description	Example
Path (repeated N times)	A string of characters	WWWWWWAAAASDDDDSSAWASASDDDDSAASDDDD WWWWWDSDWSDWSDSAAAAASDDDDDSAAAAASDDDDD AAAAASDDDDSSAWASAWASASDDDDDSAAAAA
